

They might not want to admit it, but even superheroes need a plan. And let's face it—they're people of action, not necessarily the best planners. If they're lucky, they have a sidekick who can take care of the planning and preparation of things, so their mission is a success.

Think about Green Hornet for a minute. You remember how he was always ready to jump into the thick of it, tangle with the bad guys, and not hesitate for a second? Good thing he had his trusty sidekick, Kato, to come up with an effective plan. It wasn't always a complex plan—just the right plan for the situation.

If you want to be your company's authentication superhero, maybe you need a sidekick—with the right plan.

The clock is ticking.

Picture this: a distress signal comes in about a suspicious medicine in the field. You need to know what's real...and what isn't. And the clock is ticking. There isn't enough time for a labor-intensive authentication method. But when is there? Time isn't on your side and you need a plan to instantly authenticate that product in lightning speed.
