

Job Description

Title: Sr. Software Engineer Cost Ctr: 706-000
Work Location: Addison, TX Position Status: Full-time Part-time
Division & Department: Engineering Department
Position Reports to: Manager, Software

JOB SUMMARY

We are seeking a Senior Software Engineer with a minimum of 5 years of Windows application development experience using .NET to build applications that support our customer program management platform. This position relies on extensive knowledge of and experience with C#, .NET Technologies to develop and/or integrate Windows-based applications with an Azure or AWS hosted platform. Candidate should be versed in all aspects of application architecture, UI/UX design, and development including performance, scalability, coding, caching, security, encryption, session state management, error logging and testing. Mobile app development experience and knowledge in Service Models (WCF, WebAPI) is preferred.

To support our growth, we are seeking talented, motivated employees that bring a passion for releasing quality products for our customers. Candidate will be part of the Engineering organization and work closely with product managers to ensure products and services work in a fully integrated manner as expected by the customer.

SUMMARY OF ESSENTIAL JOB FUNCTIONS

The essential functions listed below are representative of the functions that must be performed in order to satisfactorily fulfill the purpose of this job. Additional functions and duties may be assumed or assigned from time to time.

- Experience in & conformance to all phases of the SDLC to ensure a quality product.
- Design, population, updating and editing of relational databases and stored procedures
- Utilize object-oriented analysis and design techniques to deliver work products
- Strong technical writing skills to generate applicable documentation artifacts relative to products or process. (ex. Design documentation, Release Notes, Build Instructions.)
- Our SW platform ecosystem includes both 'build' and 'buy' solutions. Must be able to oversee, partner, and integrate with external SW development partners.
- Ability to seek out & quickly embrace new technologies and provide creative solutions to difficult technical challenges.
- Must be highly collaborative, resourceful, and demonstrate excellent teamwork in a cross-functional agile/scrum environment.
